

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended): A makeup kit comprising at least two cosmetic compositions, the first composition comprising at least one first dye in a physiologically acceptable medium, the second composition comprising at least one second dye in a physiologically acceptable medium, the first dye being photochromic and the second dye being at least one goniochromatic coloring agent present in a proportion of from 0.1% to 60% by weight relative to the total weight of the composition, wherein the first dye is at least one compound of formula (Ia) or (IIa) below:

(Ia)

(IIa)

in which:

- R₁ represents:
- (i) a hydrogen atom;
- (ii) a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing from 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P, and/or optionally halogenated or perhalogenated;

- (iii) a hydrocarbon-based ring formed with one of the bonds “f” or “gh” and the radical R₇; or
- (iv) a group selected from the group consisting of -COOR₄, -C(O)NR₂R₃, -NR₂R₃, -OR₄ and -SR₄, in which:
 - R₂ and R₃ either represent, independently of each other, a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P,
or, taken together with the nitrogen atom to which they are attached, form a saturated or unsaturated hydrocarbon-based heterocycle containing 3 to 10 carbon atoms and optionally 1 to 5 other hetero atoms selected from the group consisting of N, O, S, Si and P, the ring optionally being substituted with at least one linear, branched or cyclic, saturated or unsaturated hydrocarbon-based radical containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;
 - R₄ represents a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 20 carbon atoms, which is optionally halogenated or perhalogenated, and/or optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;
 - R₅ and R₆ represent, independently of each other, a group selected from the group consisting of:
 - (i) the saturated cyclic aminoaryl groups of formula (IIA) or (IIB):

in which the ring comprising N and X is a saturated ring containing in total 3 to 30 atoms, including the nitrogen, the remainder being carbon atoms and/or hetero atoms selected from the group consisting of O, S, Si and P and/or groups selected from the group consisting of -NH and -NR with R representing a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based radical containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;

- (ii) the indolinoaryl groups of formula (III):

in which R₁₀ and R₁₁ represent, independently of each other, a group selected from the group consisting of (i) linear, branched or cyclic, saturated or unsaturated hydrocarbon-based groups containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and

P, and/or optionally halogenated or perhalogenated; (ii) halogen atoms; (iii) -CN (nitrile), -COOH (carboxylate) or -NO₂ (nitro) groups; (iv) a hydrogen atom; (v) a group selected from the group consisting of -C(O)NR₂R₃, -NR₂R₃, -OR₄ and -SR₄ with R₂, R₃ and R₄ having the meanings given above; (vi) the radicals R₁₀ and R₁₁ together possibly forming a saturated or unsaturated hydrocarbon-based ring containing in total 5 to 8 atoms (including the atoms of the indoline ring), the atoms being selected from the group consisting of C, O, S and/or NR with R representing H or a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based radical containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P,

- (iii) the groups of formula (IV):

in which m and p are, independently of each other, integers ranging from 2 to 5;

- (iv) the unsaturated cyclic aminoaryl groups of formula (VA), (VB) or (VC):

(VC)

in which R₈ and R₉ represent, independently of each other, a group selected from the group consisting of (i) linear, branched or cyclic, saturated or unsaturated hydrocarbon-based groups containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P, and/or optionally halogenated or perhalogenated; (ii) halogen atoms; (iii) -CN (nitrile), -COOH (carboxylate) or -NO₂ (nitro) groups; (iv) a hydrogen atom; (v) a group selected from the group consisting of -C(O)NR₂R₃, -NR₂R₃, -OR₄ and -SR₄ with R₂, R₃ and R₄ having the meanings given above;

- (v) a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P; and especially a group selected from the group consisting of -C₆H₄-CONR₂R₃, -C₆H₄-NR₂R₃ and -C₆H₄-OR₄ with R₂, R₃ and R₄ having the meanings given above;

- R₇ represents a group selected from the group consisting of:

- (i) linear, branched or cyclic, saturated or unsaturated hydrocarbon-based groups containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P, and/or optionally halogenated or perhalogenated;

- (ii) halogen atoms;

- (iii) -CN (nitrile), -COOH (carboxylate), -NO₂ (nitro), -N=N- (azo), =NH (imino) or -CONH₂ (amide) groups;

- (iv) a hydrogen atom;

- (v) a group selected from the group consisting of $-\text{C}(\text{O})\text{NR}_2\text{R}_3$, $-\text{NR}_2\text{R}_3$, $-\text{OR}_4$ and $-\text{SR}_4$ with R_2 , R_3 and R_4 having the meanings given above;
- (vi) the radical R_7 also possibly forming, with one of the bonds “i”, “j”, “k” or “g,h” taken with the radical R_1 , or “f” taken with the radical R_1 , a saturated hydrocarbon-based ring containing in total 3 to 8 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;
- R'_1 represents a group selected from the group consisting of:
 - (i) a hydrogen atom;
 - (ii) a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P, and/or optionally halogenated or perhalogenated;
 - (iii) a group selected from the group consisting of $-\text{C}(\text{O})\text{NR}_2\text{R}_3$, $-\text{NR}_2\text{R}_3$, $-\text{OR}_4$ and $-\text{SR}_4$, with R_2 , R_3 and R_4 having the meanings given above;
- R'_2 represents a group selected from the group consisting of:
 - (i) linear, branched or cyclic, saturated or unsaturated hydrocarbon-based groups containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P, and/or optionally halogenated or perhalogenated;
 - (ii) halogen atoms;
 - (iii) $-\text{CN}$ (nitrile), $-\text{COOH}$ (carboxylate), $-\text{NO}_2$ (nitro), $-\text{N}=\text{N}-$ (azo), $=\text{NH}$ (imino) or $-\text{CONH}_2$ (amide) groups;
 - (iv) a hydrogen atom;
- (v) a group selected from the group consisting of $-\text{C}(\text{O})\text{NR}_2\text{R}_3$, $-\text{NR}_2\text{R}_3$, $-\text{OR}_4$ and $-\text{SR}_4$, with R_2 , R_3 and R_4 having the meanings given above.

2. (Previously Presented): The kit according to claim 1, wherein the photochromic dye is organic.

3. (Canceled).

4. (Previously Presented): The kit according to claim 1, wherein at least one of the first and second compositions comprise a fatty phase and an aqueous phase.

5-7. (Canceled).

7. (Withdrawn): The product according to claim 5, wherein R₁ represents a hydrogen atom; a hydrocarbon-based ring with one of the bonds "f" or "gh" and the radical R₇; or a group selected from the group consisting of -COOR₄, -NR₂R₃, -OR₄ and -SR₄, in which:

- R₂ and R₃ either may represent, independently of each other, a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P,

or, taken together with the nitrogen atom to which they are attached, may form a saturated or unsaturated hydrocarbon-based heterocycle containing 3 to 10 carbon atoms and optionally 1 to 5 other hetero atoms selected from the group consisting of N, O, S, Si and P, the ring optionally being substituted with at least one linear, branched or cyclic, saturated or unsaturated hydrocarbon-based radical containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;

and/or

- R₄ represents a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 20 carbon atoms, optionally halogenated or perhalogenated and/or optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;

and/or

- R₅ and R₆ may represent, independently of each other, a group selected from the group consisting of:

- the saturated cyclic aminoaryl groups of formula (IIA) or (IIB):

in which the ring comprising N and X is a saturated ring which contains in total 3 to 30 atoms, including nitrogen, the rest being carbon atoms and/or hetero atoms selected from the group consisting of O, S, Si and P and/or groups selected from the group consisting of -NH and -NR with R representing a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based radical containing 1 to 20 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P;

- a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 1 to 30 carbon atoms, optionally comprising 1 to 5 hetero atoms selected from the group consisting of N, O, S, Si and P; and especially a group selected from the group consisting of -C₆H₄-CONR₂R₃, -C₆H₄-NR₂R₃ and -C₆H₄-OR₄ with R₂, R₃ and R₄ having the meanings given above.

8. (Canceled).

9. (Withdrawn): The product according to claim 5, wherein the first dye corresponds to formula (II) for which:

- R'₁ represents hydrogen or a group -COOR with R being a saturated hydrocarbon-based radical containing 1 to 12 ;

and/or

- R₅ and R₆ represent, independently of each other, either (i) a group of formula (IIA):

in which the ring comprising N and X is a saturated ring containing in total 4 to 7 atoms including nitrogen,

or (ii) a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 5 to 14 carbon atoms, optionally comprising 1 or 2 hetero atoms selected from the group consisting of N, O and S;

and/or

- R'₂ represents hydrogen or a group -NR'R'', with R' and R'', which may be identical or different, representing a linear or branched, saturated hydrocarbon-based group containing 1 to 12 carbon atoms.

10. (Previously Presented): The kit according to claim 1, wherein the first dye is selected from the group consisting of:

- 3,3-di(4-methoxyphenyl)-6-morpholino-3H-naphtho[2,1-b]pyran
- 3-phenyl-3-(4-morpholinophenyl)-6-morpholino-3H-naphtho[2,1-b]pyran
- 3-phenyl-3-(4-piperidinophenyl)-6-morpholino-3H-naphtho[2,1-b]pyran
- 3-phenyl-3-(4-piperidinophenyl)-6-carboxymethyl-9-N-dimethyl-3H-naphtho[2,1-b]pyran
- 2-phenyl-2-(4-piperidinophenyl)-5-carboxymethyl-9-N-dimethyl-2H-naphtho[1,2-b]pyran, and
- mixtures thereof.

11. (Previously Presented): The kit according to claim 1, wherein the first dye(s) is(are) present in a proportion of from 0.001% to 20% by weight, relative to the total weight of the composition containing it or them.

12. (Previously Presented): The kit according to claim 1, comprising at least two different first dyes in the same composition.

13. (Canceled).

14. (Previously Presented): The kit according to claim 1, wherein the goniochromatic coloring agent is selected from the group consisting of multilayer interference structures and liquid-crystal coloring agents.

15. (Previously Presented): The kit according to claim 14, comprising a goniochromatic coloring agent of multilayer interference structure comprising at least two layers, each layer, optionally independently of the other layer(s), being made from at least one material selected from the group consisting of the group consisting of the following materials: MgF_2 , CeF_3 , ZnS , ZnSe , Si , SiO_2 , Ge , Te , Fe_2O_3 , Pt , Va , Al_2O_3 , MgO , Y_2O_3 , S_2O_3 , SiO , HfO_2 , ZrO_2 , CeO_2 , Nb_2O_5 , Ta_2O_5 , TiO_2 , Ag , Al , Au , Cu , Rb , Ti , Ta , W , Zn , MoS_2 , cryolite, alloys and polymers, and combinations thereof.

16. (Withdrawn): The product according to claim 14, comprising a liquid-crystal coloring agent obtained by polymerization of a monomer mixture comprising:

- a) at least a first monomer A of formula (I) Y1-A1-M1-A2-Y2

in which

- i) Y1 and Y2 , which may be identical or different, represent an acrylate or methacrylate group;

- ii) A1 and A2 , which may be identical or different, represent a group of formula $-\text{C}_n\text{H}_{2n}-$, in which n is an integer ranging from 1 to 20;

- iii) M1 denotes a group of general formula (I') $-\text{R}_1-\text{X}_1-\text{R}_2-\text{X}_2-\text{R}_3-\text{X}_3-\text{R}_4-$, in which R_1 and R_4 denote $-\text{O}-$, and R_2 and R_3 denote $-\text{COO}-$,

and X_1 , X_2 and X_3 are a 1,4-phenylene group, the carbonyl group $-\text{CO}-$ of R_2 and of R_3 , respectively, being linked to the group X_1 or X_3 , respectively,

and

- b) at least a second monomer B, which is chiral, of formula (II) V1-W1-Z-W2-V2 , in which

- i) V1 denotes an acrylate or methacrylate group, and V2 denotes a C_1 - C_{20} alkyl, C_1 - C_{20} alkoxy, $(\text{C}_1$ - $\text{C}_{20})$ alkoxycarbonyl or $-\text{OH}$ group;

- ii) W1 represents a divalent group of formula $-X'1-CO-O-$,
W2 represents a divalent group of formula $-O-CO-X'1-$,
in which $X'1$ denotes a 1,4-phenylene group,
and Z denotes a chiral group containing two bonds, derived from the
dianhydrohexite group, in particular a divalent radical of formula:

17. (Withdrawn): The product according to claim 16, wherein the liquid-crystal coloring agent is obtained from a monomer mixture comprising from 70% to 99% by weight of monomer A and from 1% to 30% by weight of monomer B, relative to the total weight of monomer A and of monomer B.

18. (Withdrawn): The product according to claim 14, wherein the liquid-crystal coloring agent is present in a proportion of from 0.01% to 99% by weight, relative to the total weight of the composition containing it.

19. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise at least one non-goniochromatic dye that is different from the first dye.

20. (Previously Presented): The kit according to claim 19, wherein the dye is selected from the group consisting of water-soluble or liposoluble monochromatic dyes, pigments, reflective particles and nacles, and mixtures thereof.

21. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one liposoluble or water-soluble monochromatic dye.

22. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one liposoluble or water-soluble monochromatic dye in a proportion of from 0.001% to 15% by weight relative to the total weight of the composition containing it.

23. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one pigment.

24. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one pigment in a proportion of from 0.01% to 25% by weight relative to the total weight of the composition containing it.

25. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one nacre.

26. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one nacre in a proportion of from 0.01% to 20% by weight relative to the total weight of the composition containing it.

27. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least reflective particles.

28. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least reflective particles in a proportion of from 0.1% to 20% by weight relative to the total weight of the composition containing them.

29. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) comprise(s) at least one oily phase.

30. (Previously Presented): The kit according to claim 29, wherein the oily phase comprises one or more polar or apolar, volatile or non-volatile oils.

31. (Previously Presented): The kit according to claim 29, wherein the oily phase comprises from 5% to 100% by weight of polar oil(s) relative to the total weight of the oily phase.

32. (Previously Presented): The kit according to claim 29, wherein the oily phase comprises from 5% to 100% by weight of a polar oil(s) relative to the total weight of the oily phase.

33. (Previously Presented): The kit according to claim 29, wherein the oils are selected from the group consisting of volatile or non-volatile oils of animal, plant, mineral or synthetic origin, and mixtures thereof.

34. (Previously Presented): The kit according to claim 33, wherein the oils are selected from the group consisting of animal or plant oils, synthetic esters and

ethers, fatty acids, fatty alcohols, linear or branched hydrocarbons of mineral or synthetic origin, and glycerides, and mixtures thereof.

35. (Previously Presented): The kit according to claim 29, wherein the oily phase is such that the first dye(s) is(are) soluble therein.

36. (Previously Presented): The kit according to claim 29, wherein the oily phase is present in a proportion of from 1% to 99% by weight relative to the total weight of the composition containing it.

37. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) from 0.1% to 50% by weight of a fatty substance other than an oil, relative to the total weight of the composition containing it.

38. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) is(are) anhydrous.

39. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) comprise(s) at least one aqueous phase.

40. (Previously Presented): The kit according to claim 39, wherein the aqueous phase comprises from 0.1% to 14% by weight of a C₂-C₆ monoalcohol, relative to the total weight of the aqueous phase.

41. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one surfactant.

42. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one surfactant in an amount ranging from 0.01% to 30% by weight relative to the total weight of the composition containing it.

43. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one thickener.

44. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one thickener in a proportion of from 0.01% to 6% by weight relative to the total weight of the composition containing it.

45. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one film-forming polymer.

46. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one film-forming polymer in a proportion of from 0.01% to 40% by weight relative to the total weight of the composition containing it.

47. (Previously Presented): The kit according to claim 1, wherein the first and/or second composition(s) further comprise(s) at least one filler.

48. (Previously Presented): The kit according to claim 1, wherein wherein the first and/or second composition(s) further comprise(s) at least one filler in a proportion of from 0.01% to 60% by weight relative to the total weight of the composition containing it.

49. (Withdrawn): A process for making up the skin, the lips and/or the integuments, comprising the application of the product according to Claim 1 to the skin, the lips and/or the integuments.

50. (Withdrawn): The process according to claim 49, wherein a first composition comprising at least the first dye in a physiologically acceptable medium is applied, as a first coat, and a coat of the second composition comprising at least one goniochromatic coloring agent in a physiologically acceptable medium is then applied over all or part of the first coat.

51. (Canceled).

52. (Withdrawn): The kit according to claim 51, further comprising means for applying the first and the second composition to the skin, the lips and/or the integuments.

53. (Withdrawn): The kit according to claim 51, further comprising application means selected from the group consisting of brushes, pens, pencils, felts, nibs, sponges and foams.

54. (Withdrawn): The kit according to claim 51, wherein the first and second compositions are packaged in separate packaging articles.

55. (Canceled).

56. (Currently Amended): A makeup kit comprising at least two cosmetic compositions, the first composition comprising at least one first dye in a physiologically acceptable medium, the second composition comprising at least one second dye in a physiologically acceptable medium, the first dye being photochromic and the second dye being at least one goniochromatic coloring agent present in a proportion of from 0.1% to 60% by weight relative to the total weight of the composition, wherein the first dye is at least one compound of formula (Ia):

(Ia)

(IIa)

for which:

- R₁ represents hydrogen; or a group -COOR with R being a saturated hydrocarbon-based radical containing 1 to 12 carbon atoms,; or a group

and/or

- R₅ and R₆ represent, independently of each other, either (i) a group of formula (IIA):

in which the ring comprising N and X is a saturated ring containing in total 4 to 7 atoms, including nitrogen, and especially 3 to 5 carbon atoms and 0 or 1 oxygen atom; and in particular a group of formula:

or (ii) a linear, branched or cyclic, saturated or unsaturated hydrocarbon-based group containing 5 to 14 carbon atoms, optionally comprising 1 or 2 hetero atoms selected from the group consisting of N, O or S;

and/or

R_7 represents a hydrogen atom or a group $-NR_2R_3$, with R_2 and R_3 representing, independently of each other, a linear or branched, saturated hydrocarbon-based group containing 1 to 12 carbon atoms.

57. (New): The kit according to claim 1, wherein the first composition is a basecoat and the second composition is a topcoat.
